

MODULCLEAN® Inside Out Cleaning System

Habasit-Solutions in motion

Habasit, your partner for conveying solutions, offers the **MODULCLEAN®** System.

The **MODULCLEAN®** System, a product of Habasit's superior technology and industry expertise, combines a multi-tooth sprocket with a targeted spray nozzle cleaning system. Increased productivity, improved sanitation standards, and reduced labor costs are all benefits of the **MODULCLEAN®** System.

By combining the patented **MODULCLEAN®** System with HabasitLINK® plastic modular belts and HabaGUARD® antimicrobial technology, Habasit offers the most comprehensive package available to help you improve hygiene and sanitation standards in your plant.

MODULCLEAN®

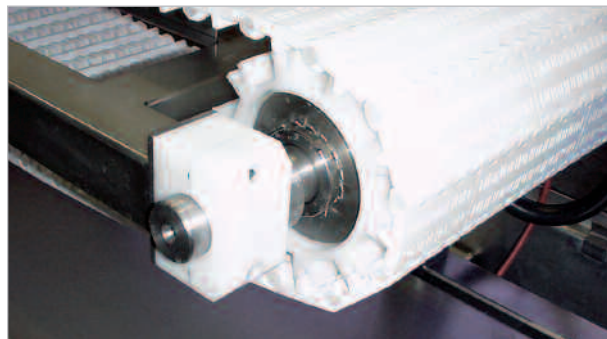

Easy and Simple System Installation

Installing the **MODULCLEAN®** System couldn't be easier. Simply replace an idler roller with a 4, 6, or 10 inch diameter **MODULCLEAN®** unit and connect the water supply. A detergent/sanitizer supply can also be connected, if desired.

Habasit is the full-range belting manufacturer to the food industry. Our belts are engineered for easier cleaning and for longer service life.

For more information on how **MODULCLEAN®** can help you reduce costs and maximize productivity in your plant, please contact your Habasit Representative today.

Save Money & Increase Productivity

- Since water and cleaning agents are directed where needed, actual water usage and wastewater processing can be reduced
- Improved cleaning in hinge areas and rod recesses is consistent and predictable
- Automatic operation reduces labor costs and frees personnel for other activities
- Consistent cleaning increases on-time start-ups

Improves Cleaning

- Positive tooth engagement and precision nozzles aim cleaning water directly at the hinge area as it opens
- Combined with HabasitLINK's® dynamic open hinge design, cleaning from the inside out forces debris out from between the hinge area
- Detergent and sanitizers can be automatically applied

Conveying Solutions

Habasit is the only company that offers both Domestic and European fabric belts as well as plastic modular belts. Contact one of our Customer Care Representatives, Market Development Managers, Sales Engineers, Key Account Managers or Authorized Distributors for the optimal solution for your application. The breadth of our product line allows us to recommend the right belt for each application.
